BAKER AVIATION CONTINUES GROWTH PATH - ESTABLISHES DEALERSHIP FOR LED REPLACEMENT CABIN LIGHTING SYSTEM

May 1, 2015 – Addison, Texas – Baker Aviation, a full service aircraft maintenance, management and charter company in North Texas, announced they are now a recognized Dealer for the line of Aircraft Lighting International (ALI) LED replacement bulb systems.

Aircraft Lighting International (ALI) is a TSO, FAA-PMA approved manufacturer of replacement fluorescent lamps, which are direct replacements for B/E Aerospace and Aerospace Lighting Corp. fluorescent lamps. ALI's new LED lighting system replaces fluorescent lamps directly without requiring any new wiring or connectors. The advanced and fully dimmable LED replacement lamps make the conversion from fluorescent to LED easy, fast and extremely economical.

“We continue to look for ways to offer a wider array of services to our customers and we are excited to offer this innovative solution to an LED lighting upgrade,” commented Ray Goyco, Jr., President and Chief Operating Officer for Baker Aviation. “This solution will not only allow us to provide our growing client base with significant savings but the entire LED upgrade can be completed in only two weeks from procurement, delivery to installation. Customers can easily choose to combine it with a minor or major maintenance event. This is an LED solution that allows Baker Aviation to quickly transform our customers’ aircraft with a brighter, more attractive cabin without exceeding their budget,” added Goyco.

Baker Aviation will receive special dealer pricing on the ALI line of products including their latest ALI 28V DC LED Lamp Kit which incorporates the LED Lamp and Ballast as one unit. It also comes with easy installation, fully dimmable capability, customizable lengths, and customizable colors also. The ALI Replacement LED Lamps are all 100% interchangeable with B/E Aerospace Fluorescent Lamps.

“Baker Aviation is a fast growing MRO facility that is looking for ways to add value to their customers’ experience. Therefore establishing them as a dealer for our LED products is a good fit for both of us and we look forward to working with Ray and his team,” stated Pelle Nilsson, Executive Vice President for Aircraft Lighting International.

About Aircraft Lighting International

Since 1998, Aircraft Lighting International (ALI) has been providing state-of-the-art, safety-certified aircraft interior lighting systems. We strive to meet the needs of our customers and aim to continue to be the innovative leader in aviation lighting. ALI's Replacement LED Lamps are interchangeable with the existing 12 mm series Fluorescent Lamps and require no rewiring, no new lamp holders, no new connectors, no new dimmers, and no new controllers. These innovative and fully dimmable LED replacement lamps make the conversion from fluorescent to LED easy and economical.
